RO RUST CUT 100

DESCRIPTION

Roots rust remover is a product to protect iron from rusting and turns into a stable chemical compound, through a chemical reaction.

ADVANTAGES ;

It is protection coat for rusty iron. Due to the chemical reaction.

Roots rust remover changes rust into a stable chemical compound and prevents the iron to become rusty again.

Protected iron can be painted with the most used paints.

TECHNICAL DATA;

Finish	Hard surface after curing
color	White / yellow
Solid by volume	32 %
TSR	20 m² / Kg (15 µ DFT)
Recommended dry film thickness	30 µ
Specific gravity	0.99
Wet film thickness	95 µ
Recoat interval (25 ºC & 60 % R.H)	
Min	1 hr
Max	5 days
Thinner	Tap water
Shelf life	24 months (at normal condition in original containers)
Method of application	By brush and spray.
Mode of application	The surface must be dry and clean from dirt's, oils, greases and old paints must be removed by sandblasting or steel brush. After the reaction of mono-rust cut the coats become black.
